Dear Ms. Smith,

We understand that you may have documents/emails responsive to FOIA EPA-R6-2015-000615 - Deepwater Horizon - SSID # Z6DW. We have been tasked to retrieve your documents. Please let us know when it would be convenient for you to allow us to retrieve your documents/emails.

\*\*\*\*Please note that due to recent IT upgrades from Microsoft Office 2007 to Microsoft Office 2013 our normal operating procedures for email retrieval will change if you have been upgraded to Microsoft Office 2013.

Due to the incompatibility of Adobe X and Microsoft Outlook 2013, we are currently unable to produce PDF portfolios at your work station as we have in the past. We currently have a temporary alternative method to retrieve your documents from Microsoft Outlook 2013:

1. We will need to schedule a time with you to come to the 8<sup>th</sup> floor (Day forward record room) and log in to your email at a designated work station that has Microsoft Office 2007. We will be able to follow our current operating procedures at this work station and will be able to save your responsive emails in a group.
2. If you would like to bring your laptop down to the day forward record room and continue to work, we have a LAN drop set up for an added convenience as we capture your records.

Thanks,  
Sharon Martin

>  
> The Requester is seeking copies of any information the U.S. Environmental Protection Agency Region 6 Superfund Division may have pertaining to correspondence between any EPA Office / Region (including the Administrator) and Chemrick / Cardno Chemrisk, and their employees regarding any and all human health effects after the explosion of BP's Deepwater Horizon well, including correspondence regarding the oil, the dispersants, any additional chemicals used, and any activities utilized (such as in situ burning). The dates of correspondence requested are from April 19, 2010 through October 18, 2014. In addition, the requester would like copies of any and all records indicating any EPA employee experienced any health impacts while working along the Gulf Coast (Louisiana, Texas, Mississippi, Alabama and Florida) during and after the clean-up operations (from April 20, 2010 to October 18, 2014). Please note, the health impacts do not need to have been directly attributed to the oil and/or dispersant used during the disaster.

>  
> Toeroek has completed the preliminary research for this request and did locate potentially responsive information in SEMS for this request. However, due to the nature of the request, we only searched SEMS, and did not locate any potentially responsive information for ChemRisk or Cardno Chemrisk; although, we did locate Health Assessment information. Also, we will provide a metadata extraction of the potentially responsive documents, at a later date. The requester has provided a \$25 fee commitment. This Multi-Division request is due on November 18, 2014. If you have any questions regarding the research, please let me know.
